

Young Social Entrepreneurs Global 2022 | Shortlisted Teams

Anahat For Change Foundation (India)

Sector: Education & Training | Environment & Energy | Water & Sanitation

Headed by Ms Purvi Tanwani, Anahat For Change Foundation is a non-profit that aims to empower women through skills development, with sustainability at its core. Specifically, it works with urban and rural communities to raise awareness on personal safety education, sexual reproductive health rights as well as menstrual health and hygiene. Anahat also produces its own brand of reusable and affordable menstrual pads for women in rural areas. These cloth pads are made by the women Anahat works with and can be used for up to 3 years.

Beebag (Malaysia)

Sector: Consumer Goods | Environment & Energy | Technology & Digital Platform

Headed by Mr Joshua Lim and Joel Lim, Beebag hopes to eliminate single-use plastics by encouraging shoppers to reuse their shopping bags through gamification and technology. It produces smart bags embedded with near-field communication technology and works with an app to reward consumers for re-using their bags – thus translating environmental-friendly practices into real-life savings.

Fabriulous

Fabriulous (China)

Sector: Arts & Culture | Consumer Goods | Consumer Services

Headed by Ms Samantha Chengcheng Xu, Fabriulous is an ethical fashion business that aims to preserve traditional handcraft techniques while reducing waste and lowering carbon emissions. It features unique, made-to-order products that are handmade by rural ethnic artisans in China using upcycled, vintage materials. The business model not only helps to protect the environment, but also sustains local artisans through the provision of jobs and income.

KURA KURA (Singapore)

Sector: Technology & Digital Platform

Headed by Ms Lynette Lim, Kura Kura is a mobile application that gamifies reflective journaling practices while providing an avenue for users to support one another in their journey towards mental wellness.

Mengayu (Indonesia)

Sector: Consumer Services | Education & Training | Healthcare

Headed by Ms Riza Nisriinaa and Ms Saras Dumasari, Mengayu aims to empower vulnerable women – victims of domestic and dating violence and those who have lost their jobs during the Covid-19 pandemic. It provides them with job training and safe working spaces to help them regain their confidence and become financially self-sufficient.

MiYork Education (Vietnam)

Sector: Education & Training | Public Services & Volunteerism | Technology & Digital Platform

Headed by Mr Khoa Tran, Ms Tuyet Nguyen, and Ms Hoai Luu, MiYork Education provides research mentorship, competition-based learning, social project mentorship, as well as college admission consultancy for both Vietnamese and overseas universities to students. Through MiYork Education's programmes, students can also develop practical skills to start their own social enterprises in the future.

Palmira Indonesia (Indonesia)

Sector: Agriculture

Headed by Mr I Komang Sukarma, Palmira Indonesia aims to decrease urbanisation by reducing the need for villagers to move to cities for job opportunities. It produces organic sugar from the sap of the palmyra palm tree – a plant that is indigenous to Karangasem in Bali, Indonesia – while providing employment to farmers, women, and youth from village communities in the area.

RE-invent (Thailand)

Sector: Consumer Goods | Environment & Energy | Technology & Digital Platform | Water & Sanitation

Headed by Mr Intust Prachakitkult, Ms Virada Poopipathiranyakul, and Mr Pactahara Methajittiphan, Re-invent aims to create products and services that can effectively distribute liquid household cleaning products while reducing the use of plastics. These products and services are designed for customers who live both in a community setting – such as university dormitories – as well as individual accommodation.

Ripple Community (Malaysia)

Sector: Education & Training | Healthcare | Public Services & Volunteerism

Headed by Ms Joey Kee, Ripple Community aims to provide comprehensive and affordable behavioural healthcare to individuals with mental health and special needs, while raising awareness of such these health issues. Through multidisciplinary care teams, evidence-based programmes and a family-focused approach, it aims to provide not just intervention for patients – but to develop a holistic support system that is sensitive to their needs.

Sahabat Laut Lestari (Indonesia)

Sector: Technology & Digital Platform

Headed by Mr Eko Octavianus Chalim, Mr I Wayan Jepriana, and Ms Shanice, Sahabat Laut Lestari aims to solve the problem of fish laundering taking place in Indonesia and globally, when fishes that are caught illegally end up in the legal supply chain. It uses Traceability Information Technology to record and reveal data throughout the supply process, from the catching to shipping and distribution of fish. It also hopes to provide an improvement programme and certification process to help fisheries demonstrate sustainability, as this could become an essential requirement for the industry in future.

SpedGrow (Singapore)

Sector: Education & Training

Headed by Ms Zoe Poh and Ms Yan Ning Tan, SpedGrow aims to create a comprehensive, inclusive and cohesive ecosystem for children with special needs. It does this through the development of online resources to help parents work with their children at their own time and pace. It also links parents needing a short respite to caregivers that can help to engage their children in a meaningful way.

Symbionic (India)

Sector: Healthcare | Technology & Digital Platform

Headed by Mr Varun Iyer S, Symbionic specialises in the production of prosthetic devices that utilise bio-integrated technology. It also hopes to make these devices more accessible to patients who have lost their limbs.

The Green (Laos)

Sector: Agriculture | Consumer Services | Environment & Energy

Headed by South Korean Mr Jaewon Lee and Laotians Mr Soukhavy Sisouphanh and Mr Bounpaseuth Southammakoth, The Green aims to create stable incomes for small farmers in Laos through carbon-reducing agricultural technology. Given that 70% of the Lao population works in the agriculture industry, this will prevent their income and livelihood from taking a hit with the worsening climate crisis.

Upcycle Corps (India)

Sector: Consumer Goods | Environment & Energy | Technology & Digital Platform

Headed by Ms Komal Hemant Parakh, Upcycle Corps. is India's first B2B2C (business-to-business-to-consumer) marketplace platform dedicated solely to sustainable goods and services. It aims at encouraging slow and mindful consumption, by offering organic, vegan, handcrafted, chemical-free and eco-friendly products across every product category on its e-commerce platform. Its business model also supports the Indian Government's 'Make in India' initiative.

Urban Orgins (Singapore)

Sector: Education & Training | Environment & Energy | Technology & Digital Platform

Headed by Ms Suzanna Tang, Urban Origins connects and rewards communities that take action for a healthier planet. Its tech platform aims to facilitates and showcase individuals' participation in sustainable activities, while allowing users to track, quantify and be rewarded for their actions taken anywhere around the world.
